FINALLY SOME TRENDS!

I really don't know what got this thing started finally, but a lot of my top holdings really started to blast off this past week.

Check out United Rental (URI) above. I just [wrote](#) about this stock recently for [MarketWatch](#). It was titled:

I also like the fact that the shares are still trading at a big discount to their expected growth rate.

I featured Continental Resources in my book **Best Stocks Now** back on February 22, 2011. The stock is up 124% since then. I have written many article about this company recently.

The company has recently caused quite a stir by filing for a permit from the U.S. government to EXPORT oil. That is right....EXPORT oil. The U.S. actually has a surplus of LIGHT SWEET CRUDE and a shortage of HEAVY CRUDE.

There has been a ban on U.S. companies exporting oil since the oil embargo of 1975. This will be an interesting story to watch going forward. I featured this stock on my daily appearance on local channel 6 news one day this week. You can watch my analysis [here](#).

I recently [wrote](#) yet another article about this stock for **Seeking Alpha**. It was titled:

Continental Resources: Leading Energy Stocks To Replace Biotech This Year

The Transportation Sector is one of the leading sectors this year. The railroads are part of this move.

I wrote about Union Pacific this past week:

[Did Buffett buy the wrong railroad?](#)

The Canadian railroads are also taking off.

And what about this INDIA story?

Maybe it was my **TRENDLESS** headline last week that finally got this market going! ☺

Here is how we finished the week.

THIS WEEK'S BOTTOM LINE

This past week saw the first real change in the market for several months...

Bill Gunderson's Conservative Growth Model Portfolio

This model is made up of mostly large and mid-cap companies that I consider suitable for investors who have a **conservative growth risk profile**. Time horizon of at least 3-5 years would be appropriate. **Investors need to be able to ride through swings of 10-18%, however.**

This portfolio was up **23.8%** in 2013. This is net of an annual mgt. fee of 2% and all \$7 trades. This portfolio is

Actual Portfolios may vary depending on start time and actual stock mix. Big losses could occur if extreme events were to hit the world suddenly.

Bill Gunderson's Income & Growth Model Portfolio

This portfolio is for investors seeking Income along with the possibility of Growth. This is a good mix for retirees who are seeking a **CD** alternative-albeit with greater risk. This is my **MOST CONSERVATIVE** portfolio. Still, investors need to be able to handle a **10-15% swing**. This portfolio currently has an average yield of **3.3%**. This portfolio was up **21.75%** in 2013. It is now up **32.55%** since its August 5, 2011 inception. This works out to an annualized rate of **9.78%**. **Not bad for an Income account.**

This portfolio is up **1.26** YTD. I sold

Bill Gunderson's ETF Model Portfolio

This portfolio is for investors seeking growth. Investors should have at least a five year time horizon and be able to handle swings of 10-20%. **BIG LOSSES COULD OCCUR IF EXTREME EVENTS WERE TO HIT THE WORLD SUDDENLY.**

This portfolio was up **27.07%** in 2013. This portfolio is

Bill Gunderson's Aggressive Growth Model Portfolio

This is my most aggressive portfolio. It is designed for investors with **long-term** time horizons, seeking maximum growth. **It is also my most VOLATILE portfolio.** Investors need to be able to stomach as much as **10-20% swings** from time to time in an aggressive style of investing. This portfolio goes anywhere in the world, wherever the action is. This portfolio was up **39.5%** in 2013 after all expenses. It can also be heavily weighted in certain sectors of the market.

Bill Gunderson's 401-K/Mutual Fund Model Portfolio

Everyone has different choices to them in their 401-ks. The choices basically fall into several broad categories however: Large Cap, Mid-Cap, Small-Cap, Govt. Bond, Corp. Bond, Inflation Protected Bond, International, Emerging Market, and maybes sectors like technology, natural resources, etc.

I have added a number of mutual funds to my **Best Stocks Now** database that are representative of the various categories of funds that are available in most 401k plans. I grade them on a daily basis. I am almost done with my **BEST MUTUAL FUNDS NOW™** app.

If you have a wide selection of mutual funds in your plan, here is my current recommendation. This portfolio was up **31.33%** in 2013 (net of all fees and trading costs).

Bill Gunderson's Trading Account (new)

This is Bill Gunderson's actual trading account. I deposited \$25,000 into it on 3/21/14 and went shopping. I have sent out a tweet on every trade I have made since. For the most part, these stocks are too small or too thinly traded for my managed accounts. This is not a day-trading account. I am looking to bag some big winners, while keeping a short leash on my positions. I am now putting in 7-8% **trailing sell stops** on all positions. I am also now buying \$2000 positions as opposed to \$1,000 positions. This is still a very tough year for active traders.

I continue to scour the market for a few good big winners!
