America Speaks...

I spent Tuesday evening at Golden Hall in San Diego, our election central. It was quiet there, it was not like a presidential election, but it was an important election nonetheless.

When all the votes were counted the results showed that Americans were saying one of two things: "Stop the quarreling and get something done" or "We aren't not happy with the direction of our country."

No matter what was behind the message, it was a fairly loud one, and the market is just glad to have another bout of uncertainty behind it. In fact, the market has been in a fairly good mood lately, and the election results did nothing to dampen that mood. The S&P 500 has now gone down 11%, and back up almost 12% in seven short weeks. I feel like I need a neck brace!

Whiplash Injuries (Head and Neck)

Does anyone know a good chiropractor? Just when it looked like the market was perched on a precipice, it has come storming back like there is now tomorrow. The Ebola scare has died down, Draghi has promised to keep Europe propped up, Earnings Season has been good, and numbers on the Economy continue to be decent.

We have also entered into a favorable time for the stock market. The average return over the years has been about 7.0% during the November through April time period. In addition to this, the average goes up to 16.3% during a mid-term election year. I don't think we will see that, (that would put the market DJIA over 20,000 by next May), but at least we have history on our side right now.

So what does a big republican victory do for the market? Here are some observations that I have made since the ballots were counted. The transportation sector is on fire.

Republicans tend to be more "oil friendly," than democrats. This bodes well for the transportation stocks. About 90% of all oil is used for transportation. Cheap oil lowers transportation expenses, thereby making transportation related stocks more profitable. We have had a "bumper crop" of oil this year. This is one of the factors that has driven oil prices to a new three-year low!

Oil has hits it three year support level however. At least "technical" are on the side of oil right now. Here are some of the stocks that should benefit for some time from cheap oil:

I own Southwest Airlines in my Conservative Growth and in my Growth & Income portfolio.

I also own Alaska Air (ALK) in these two portfolios.

Other airline stocks are also taking off, but these are two of the best, and they have the highest rankings in my Best Stocks Now™ App.

Best Stocks Sectors Dow Search

Data from Beststocksnowapp.com

Railroad stocks look like bullet trains right now. I am long Union Pacific (UNP).

I also own Kansas City Southern (KSU)

Banks have been under fire for the last several years. At least for now, investors think that the regulatory environment may become a little less hostile. I am long Wells Fargo (WFC). It is breaking out right now.

Many brokerage stocks like Raymond James (no position), are also breaking out right now.

Republicans would also like to see the Medical Device Tax, a very unpopular part of Obamacare, repealed. This is boosting this sector right now.

Sectors that could suffer from the Republican victory could possibly be alternative energy sectors like Solar:

And Wind:

These sectors need heavy government subsidies and high oil prices. This could be a tall order right now.

Republicans are happy, Democrats are depressed, and the market is relieved.

Look at how we finished the week.

I sent out A LOT of PUSH NOTIFICATIONS for all PREMIUM app subscribers this past week. I was very busy in the market again this past week. This service is now available for iOS Apple and Android premium app subscribers. In addition to the push notifications, we are also now sending out an accompanying email. These push notifications are instantaneous. This is really remarkable technology.

If you are having any trouble receiving the notifications, contact me directly at bill@pwstreet.com I have a great technical support dept. that will get right on it and help you. I aim to please all subscribers to my services!

We are working on adding these “live trading” notifications to the web based app. www.beststocksnowapp.com. It will be ready to go soon. Live trade notifications will also be available for LIVE UPDATE NEWSLETTER SUBSCRIBERS. This option will also be ready soon.

The cost for live trading notifications is \$89 per month. This service is not included in the free version of the app or the \$9.99 monthly subscription to the app. This service is also not included in the free Standard or Premium versions of the newsletter. It will be available soon however for web-based folks.

I do not tweet live trades any more. I still send out about 5-10 tweets per day however, on stocks that really look outstanding or are giving new buy or sell signals. A premium “market closing” 15 min. video for premium subscribers is also in the works. Here is a segment from one of my recent show, explaining how this service works.

Gunderson Conservative Growth Model “C” Portfolio

This model is made up of mostly large and mid-cap companies that I consider suitable for investors who have a **conservative growth risk profile**. Time horizon of at least 3-5 years would be appropriate. **Investors need to be able to ride through swings of 10-25%, however.**

This portfolio was up **23.8%** in 2013. This is net of an annual mgt. fee of 2% and all \$7 trades. This portfolio is up

Gunderson Model “D” Portfolio (Dividend & Growth)

This portfolio is for investors seeking Income along with the possibility of Growth. This is a good mix for retirees who are seeking a **CD** alternative-albeit with greater risk. This is my **MOST CONSERVATIVE** portfolio. Still, investors need to be able to handle a **10-20% swing**. This portfolio currently has an average yield of **2.9%**. This portfolio was up **21.75%** in 2013. It is now up **27.48%** since its August 5, 2011 inception. This works out to an annualized rate of 8.85%

Gunderson Aggressive Growth Model “A” Portfolio

This is my most aggressive portfolio. It is designed for investors with **long-term** time horizons, seeking maximum growth. **It is also my most VOLATILE portfolio.** Investors need to be able to stomach as much as **10-20% swings** from time to time in an aggressive style of investing. This portfolio goes anyone in in the world, wherever the action is. This portfolio was up **39.5%** in 2013 after all expenses. It can also be heavily weighted in certain sectors of the market.
